b. LUCKY DRAGON

3. Mission Execution:

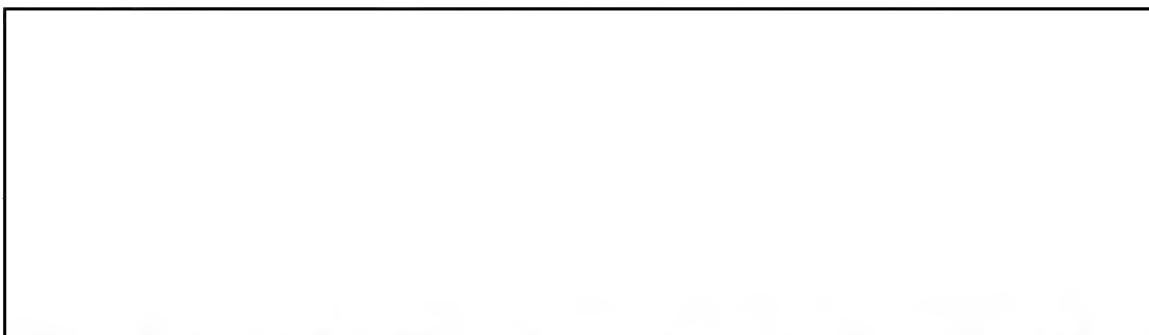

a. Command and control of USAF U-2's rests with SAC as the agent responsive to JCS (JRC). CIA U-2's respond to IDEALIST Project Headquarters direction, as has always been the case. In both instances the target requirements emanate from the COMCIA.

c. Complete coverage of South Vietnam (proposed as an IDEALIST task 11 January 1964) has not yet been finished. The proposal was delayed pending a CIA-DIA report which subsequently recommended that the job be done as requested. It appears that the photo mosaic or, alternatively, complete base line photography has been delayed in favor of Project 34A target coverage and near daily coverage of North Vietnam and environs.
